Project Name	OptiCrop – AI-Based Crop Recommendation System
Maximum Marks	4 Marks

Empathy Map

Farmers need an easy and reliable way to determine the most suitable crop based on soil nutrients and environmental conditions. They often face uncertainty due to changing weather patterns, lack of scientific guidance, and limited access to agricultural experts. They hope to increase crop yield, reduce financial losses, and make better farming decisions. **OptiCrop** helps farmers by providing fast and accurate crop recommendations using machine learning based on soil and climate data.

SAYS

- I want to grow the most profitable crop.
- My soil conditions change every season.
- I need an easy-to-use farming tool.
- I want to avoid crop failure.

THINKS

- Which crop will give the highest yield?
- Will the weather affect my crop?
- Are my soil nutrients sufficient?
- Can AI help me make better farming decisions?

Ramesh (Farmer)

Role: Small-Scale Farmer

DOES

- Tests soil nutrient levels.
- Checks weather forecasts before sowing.
- Consults agricultural experts.
- Compares different crop options before planting.

FEELS

- Hopeful about improving crop yield.
- Worried about unpredictable weather.
- Confident with AI-based recommendations.
- Happy when choosing the right crop.
